

Celltac α

Automated Hematology Analyzer
MEK-6500J/K
MEK-6510J/K

A reliable partner in your laboratory

■ User-friendly compact design

Based on over 40-year experience in manufacturing hematology analyzers, Nihon Kohden's Celltac α provides stress-free operation with newly designed hardware and software interface.

■ Flexible aspiration modes

Celltac α has several blood aspiration modes. The cap pierce mode (available on MEK-6500J/K Series) contributes to safer operation by eliminating the chance of touching blood. Capillary mode enables 10 μ L capillary blood. Sampling from neonate or infant earlobe, heel.

■ Large data capacity

Celltac α uses SD cards for reliable data storage. Over 15,000 results can be stored.
